PROFESSIONAL SUMMARY

Detail-oriented Full Stack Developer with one year of hands-on experience building scalable web applications with PHP, Laravel, MySQL, HTML, CSS, and JavaScript. Strong in MVC architecture, RESTful APIs, and responsive design, with practical skills in debugging, testing, and performance optimization. Experienced in Git-based collaboration and committed to delivering efficient, user-friendly, high-quality solutions.

WORK EXPERIENCE

Software Developer Intern | QBit Tech

Sep 2025 – Mar 2026

- Developed and maintained web applications using Laravel and MySQL.
- Collaborated with the team through GitHub, strengthening version control and problem-solving skills.
- Worked across Blade templates, controllers, migrations, and third-party integrations.

Intern | Bangladesh Bank, Head Office

Oct 2022 – Dec 2022

- Observed how ICT policies and strategies are applied within an organizational framework.
- Gained understanding of network infrastructure, uptime, and disaster recovery in maintaining data center reliability.

PROJECTS

E-commerce Management System | Laravel, PHP, MySQL

- Built a full-stack e-commerce application with product, user, and order management modules.
- Designed a centralized admin dashboard and secure authentication system, integrating the SSLCommerz sandbox for online payments.
- Applied MVC architecture to deliver a fully responsive, scalable, and maintainable interface across mobile and desktop.

Content Management System | Laravel, PHP, MySQL

- Developed a backend-driven CMS giving non-technical users full control over website text, images, and sections without code changes.
- Designed a secure, scalable architecture with an intuitive admin interface to streamline updates and improve site flexibility.
